3. After you downloaded the Forticlient, please install and open it.
4. Now you need to check the checkbox to agree to the terms and click on Next:

5. Click on „VPN Only“ to install no extra programs:

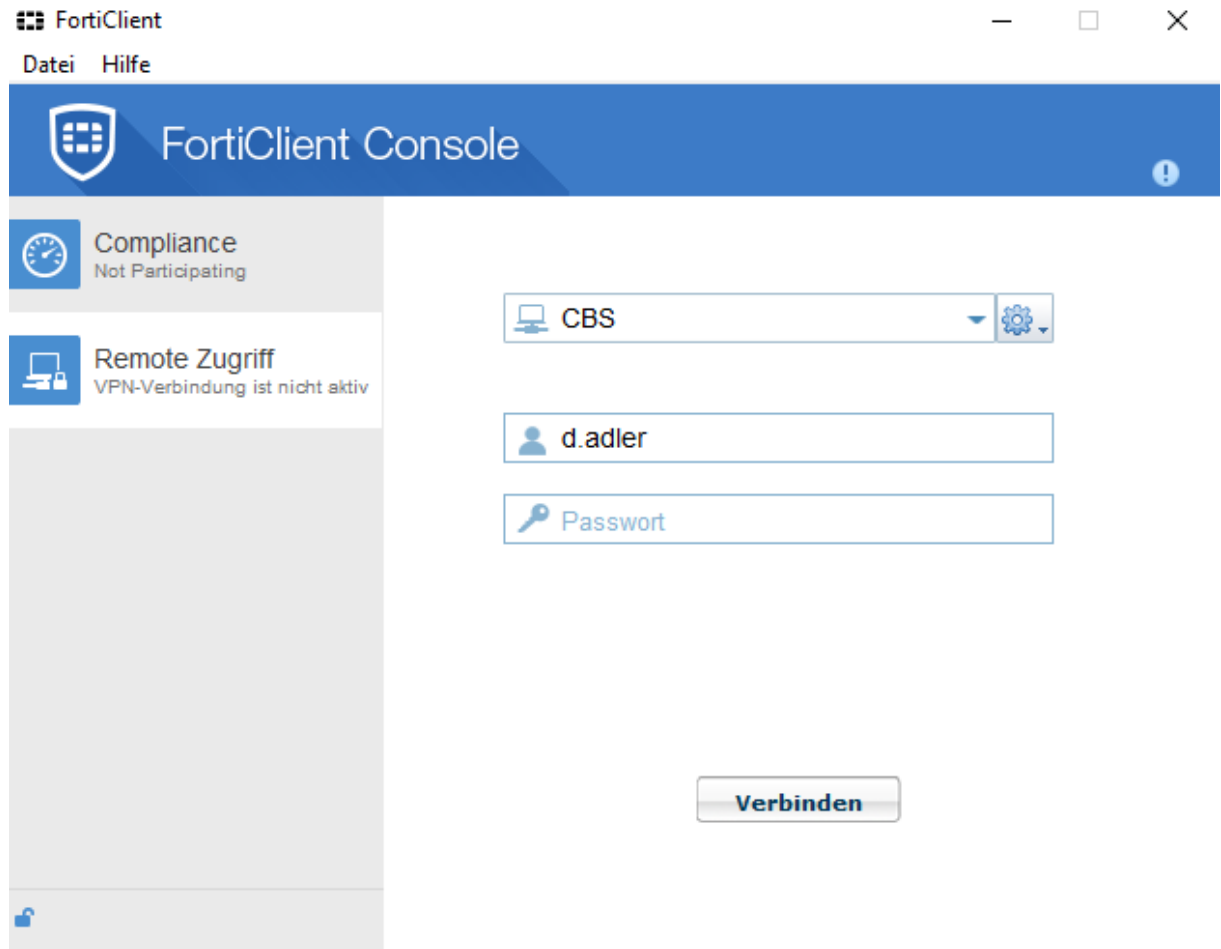

- In the next step you finish your installation by clicking onto Next and Install afterwards. This might take some minutes and then you need to restart your system.
- Next you open the VPN Client and configure it by clicking on „VPN konfigurieren“

- Now you need to enter the following data to access the CBS-Network via VPN:

9. In the last step you need to enter you password for the wifi and accept the certificate that will be asked afterwards for the first Log-In:

10. Now you are connected to the CBS-Network.
